

MuralsXpress Print Services - Artwork Requirements

Please check below with acknowledgement that you have read and accept the artwork requirements for the MuralsXpress Art print services Dept.

File Formats accepted:

.pdf - Portable Document Format
.cdr - CorelDraw™ (version X6 or lower)
.eps - Encapsulated Postscript
.psd - Adobe Photoshop CS5 or lower
.tif - TIFF bitmap
.jpg - Jpeg bitmap
.bmp - bitmap

Client is responsible for all artwork releases, permissions and licenses.

Resolution

Vector files in the native graphics format are preferred over bitmaps, especially if enlarging a graphic for wide-format output. Include fonts or convert fonts to curves. All submitted raster/bitmap files should be 150ppi to 200ppi* at print size. 150ppi is usually acceptable if transferring to fabrics. 200ppi is better for transferring to hard substrates. If it is a bitmap file, Tiffs are preferred.

* Resize image in Photoshop to the intended print size without "resampling" it to determine ppi (pixels per inch). The Image should minimally be 300 dpi for color tonality

Color

Please use the RGB color space when creating new graphics and when submitting any and all artwork. Digitally captured or scanned photos default to RGB color. We will certainly accept CMYK and other color spaces in the artwork, but we usually get better results in RGB.

NOTE: Prints from your printer will not match the output from our printer. You need to approve a proof from our printer.

Actual Print Size and Intended Substrate

Please specify the exact print size of the image requested as some artwork may get distorted when converting to a different file format. Letting us know the intended substrate will help us provide a more satisfactory print for you.

Artwork fees

Additional fees may be assessed for editing the submitted artwork. This includes text editing, proofs, color matching and design work. A full color proof or PMS (pantone matching system) color number needs to be submitted with the artwork when color matching is requested. The customer pays any shipping charges for approvals of samples/proofs. If specifying the color from a known standard (like Pantone Matching System) is not suitable for your needs, please send us a hard copy proof* to:

MuralsXpress
P.O. Box 771484
Ocala, FL 34477
(352) 301-3837

*** NOTE: The output from our printer will not match your printer nor will it match your computer's monitor. If color is important to the job, the customer must approve a proof from our production facility. Do not send original art or something you cannot afford to lose. MuralsXpress is not responsible for loss or damage of proofs.**

Expedite Fee

If the request is quicker than our stated turn-around time for a given order, an expedite fee may be assessed. Please specify any required turnaround time.
